- Currently

DevOps/IT/Dev JS,.Net

RCA SISTEMAS LTDA, Itaocara

I work to solve the most diverse problems, usually when we have a more serious problem in the company, I am called to solve it, even some bug in one of our systems. where I work alone is in the DevOps/IT part, as this area is only integrated by me, so I take care of every part of CI/CD, Pipelines, Jenkins, Servers, Dockers, VMs, Physical Servers, Servers in the Cloud, being the servers in Linux and in several distros and some Windows, S3 from Amazon for backups of some applications and important banks, automated by me with a script to be automatic daily, also used scripts together with crontab in some servers for their necessary automations. whole stack from Digital Ocean, APPs, Clusters, Kubernetes, mainly the Droplets(VM), where I configure, create, recreate, fix bugs, prepare environment of the most diverse, environment for application. net, for PHP/LARAVEL, for Websites, generally using NGINX as Web Server and Proxy. REST APIs and WebService Integration. I also do maintenance and make changes to the code of these APIs mostly on .Net.
